## FTBx-9150

OPTICAL SWITCH

## KEY FEATURES

$1 \times 2,1 \times 4,1 \times 8,1 \times 12,1 \times 16,1 \times 24,1 \times 32,2 \times 2,2 \times 4$
Singlemode and multimode
High performance
Variety of connector options

## RELATED PRODUCTS AND ACCESSORIES

Rackmount platform LTB-8

Power meter FTBx-1750

Multi-user interface EXFO Multilink

## THE OPTICAL SWITCHING SOLUTION

The FTBx-9150 optical switch series provides highly accurate and repeatable fiber-to-fiber switching. As part of the LTB-8-based test systems, the FTBx-9150 offers a choice of $1 \times 2,1 \times 4,1 \times 8,1 \times 12,1 \times 16,1 \times 24,1 \times 32,2 \times 2$ and $2 \times 4$ modules. Designed for minimal reflectance, the switches integrate precision optical components into a compact modular package. Both singlemode and multimode versions are available and offer a solution for all your optical switching needs.

| $1 \times 2$ ¢ $7 \times$ |  |
| :---: | :---: |
| $1 \times 4$ |  |
| $1 \times 8$ | input/output |
| $1 \times 12$ | common $\Delta \square$ |
| $1 \times 16$ |  |
| $1 \times 24$ |  |
| $1 \times 32$ |  |
| The $1 \times$ optical port an multipl | configurations provide precise tching between one common input/output ports-perfect for mponent or ribbon-fiber testing. |

The $2 \times 2$ configurations provide precise optical crossover switching. This particular configuration is ideal for bidirectional device testing.

The $2 \times 4$ configurations can be set to six positions. In three of these positions, one or both input channels do not transmit light to output ports.

## SUPPORTING VARIOUS APPLICATIONS

Optical switches are basic components integrated into almost every test station. The FTBx-9150 offers specifications and features to support a wide variety of applications:

- Multiple component testing
- Bidirectional testing
- Automated testing
- Remote testing
- Signal monitoring
- Equipment sharing

## LTB-8 PLATFORM

The LTB-8 is a highly scalable and compact platform featuring the industry's best 100G port density and hot-swap capabilities for no downtime or interruption in tests, and greatly improved efficiency.
The FTBx-9150 can be easily remote-controlled by means of the standard LAN or optimal GPIB interface using SPCI commands, IVI drivers or any other automation software.

| Relative humidity maximum | $80 \%$ non-condensing at $40^{\circ} \mathrm{C}$ |  |  |  |  |  |  |
| Instrument drivers | IVI drivers and SCPI commands |  |  |  |  |  |  |
| Remote control | With LTB-8 and Ethernet |  |  |  |  |  |  |
| Standard accessories | User guide, certificate of compliance and calibration certificate |  |  |  |  |  |  |

a. Specifications valid at $23^{\circ} \mathrm{C} \pm 5^{\circ} \mathrm{C}$.
b. Non-blocking.
c. Insertion loss per module, excluding connectors, measured at singlemode wavelengths of 1310 and 1550 nm , and multimode wavelength of 850 nm .
d. Backreflection is measured at singlemode wavelengths of 1310 and 1550 nm , with APC connectors, and multimode wavelength of 850 nm with UPC connectors.
 1300 nm .
f. Measured at 1550 nm .

## ORDERING INFORMATION

Example: FTBx-9150-01-04-B-EI-EUI-89
a. $2 \times \mathrm{N}$ configurations available only with 2 - and 4-channel options.
b. Multimode only.
c. Singlemode only.
d. Available on $1 \times 2,1 \times 4,1 \times 8,1 \times 12,1 \times 16,2 \times 2$ and $2 \times 4$ switches.
e. Available for $1 \times 24$ and $1 \times 32$ switches.
