

PSO-200 | OPTICAL MODULATION ANALYZER

NEW!
RENT-TO-BUY PLAN

You need an Optical Modulation Analyzer, but you have budget constraints?

THIS IS THE SOLUTION:

- › Rent a PSO-200 for 6 months with an option to buy the unit at the end*
- › If you decide to buy, you get a 70% credit on the rental amount paid
- › Program applies to PSO-220-100-ELO only, but software options can be added as required

PSO-200 KEY FEATURES

- › All-optical design providing the effective bandwidth to properly characterize waveforms and signals at 40 Gbit/s, 100 Gbit/s, 400 Gbit/s, 1 Tbit/s and beyond
- › Compatible with dual-polarization transmission
- › Fully integrated with the smallest form factor in the industry
- › Includes all the required tools to test transmitters during manufacturing (such as EVM, BER and masks)
- › Large touchscreen for high graphic quality and easy instrument control
