FTBx-8848x Series: dual-port 1G-400G, 800G-ready

The FTBx-8848x Series enables busy technicians to move smoothly and expertly between testing different rates (1G-800G), interfaces (including coherent up to 400G) and transceiver types—all with a single, compact platform. Available in three configurations, the series is supported across EXFO's portable and rackmount platforms. Plus, it's software- upgradeable to 800G.
